

**MR. ARTURO
ALMEIDA**

Tired of not being listened to by your GP
when that lump, mole, or skin tag affects
how you feel about yourself?

GET RID OF YOUR ANNOYING LUMPS AND BUMPS.

Have peace of mind about that
concerning mole without waiting
for months to be seen in the NHS

I believe that feeling confident and comfortable isn't "just cosmetic" but instead fundamental to your wellbeing. I believe that you deserve to know exactly what's happening to your body - in words you can actually understand. And that excellent surgical care should come with genuine human connection and personal attention.

This is why I dedicate my practice to minor surgery, and why I want you to feel completely at ease throughout your entire journey with me.

Let Me Explain What Minor Surgery Really Is

I often meet patients who are confused by the term "minor surgery." Let me be honest with you - a surgery is always a surgery, and I understand why they dread the word. But minor surgery (also called minor operations or MOPs) is genuinely different.

Three things that make it "minor":

They are performed under local anaesthesia

you'll feel absolutely nothing during the procedure

Done right here in the clinic

no hospital stays, no disruption to your life

Same day return to normal activities

most patients are amazed how "simple" it looks!

*The goal? To solve
your problem
with minimal fuss
and maximum
comfort.*

Scan the QR below to watch a video where I explain,
in plain English, what minor surgeries are.

What I Can Help You With

Skin Tags

Those irritating pieces that catch on jewelry or clothing - removed quickly and precisely

Moles

Whether you're concerned about changes or just don't like how they look - careful examination with minimal scarring

Lipomas

Soft, moveable lumps made of fat - often "pop out" in one piece (fascinating to see if you want to look!)

Cysts

Firm lumps that won't go away - I remove both contents AND the sac completely (crucial to prevent regrowth)

Other Skin Lesions

Cherry angiomas, seborrheic keratoses, and various growths that may be puzzling you

You're in Safe Hands

What patients are saying

"I have had several minor operations with Mr. Almeida in Doncaster. And all I can say is it has been a fantastic experience. Dr. Arturo is not just a very skilled surgeon but an amazing human being. He helped me to be at ease, was genuinely interested in me and we had very interesting conversations while he was doing his craft. I can't recommend him enough"

Steve, South Yorkshire

Why Your Health Deserves the Best

When it comes to your body, the cheapest option is rarely the best option. My 25+ years of surgical experience, the time I take to understand your concerns, the precision I bring to every procedure - this has real value. You're investing in your safety, results, and peace of mind.
